Technical Features

TAULA is the outcome of a selection of the best raw materials and a revolutionary highly technological production process known as sintered stone. Thanks to these elements and to several exhaustive quality controls along the chain, a Sintered Compact Surface of large formats and minimum thickness with extraordinary characteristics is obtained.

Only 7kg/m²(1.4 lb/sqft) in the 3mm slab and 30kg/m²(6.14 lb/sqft) in the 12mm slab.
LIGHTWEIGHT

Waterproof and liquids resistant. With an absorption level near zero.
WATERPROOF

Resistant to scratching and abrasion due to the hardness of the surface.
RESISTANT TO SCRATCHES

It does not give off any harmful substances and is totally suitable for contacting with food.
HYGIENIC

Resistant to any kind of chemical cleaning agent such as bleach or ammonia.
EASY TO CLEAN

Will not absorb liquid making it resistant to any stain.
STAIN RESISTANT

It does not give off any substances that are harmful to the environment.
100% NATURAL

Made from recycled materials.
RECYCLABLE

Will not burn or emit smoke or toxic substances in the event of a fire.

The thicknesses is one of the most important element characterizing **TAULA**. They range from 3 to 12mm, and they determine the possible applications given to TAULA slabs. 3mm can be used for interior cladding or furniture; 6mm fro both indoor and outdoor flooring or exterior cladding (ventilated facades); 12mm is set aside for the most demanding product applications such as kitchen countertops.

High-End Customization

Comes with the latest trend – Sintered stone

Sintered stone, or ultra – compact stone, is new to the market and is quickly becoming a hit with designers and home renovators alike. The sintered stone is manufactured by applying advanced technology rather than traditional method. The sintered stone is superior in a myriad of ways:

- They are waterproof, weatherproof;
- They are unaffected by heat or cold;
- They are resistant to stain, scratch;
- They are incredibly hard and impenetrable.
